EDUCATION

Indian Institute of Information Technology, Allahabad
Bachelor of Technology in Information Technology

2019 – 2023
CGPA: 8.5

EXPERIENCE

Urban Company

July 2025 – Present

Software Development Engineer II

Bangalore, India

- Led evolution of Urban Company's provider-support platform across India and Middle East markets, driving chat-first experiences, AI-powered automation and multi-channel communication infrastructure.
- Architected and scaled backend systems spanning chat, voice and telephony platforms serving **1M+ monthly support conversations** and **1M+ monthly voice interactions**, while enabling multi-geo expansion and seamless channel interoperability.
- Built LLM-powered classification, evaluation and quality-improvement systems using experimentation frameworks and automated analysis tooling, driving **~10% improvements in support-routing accuracy**.
- Served as a key technical owner for provider-support systems, mentoring junior engineers and driving architecture, design and execution across frontend and backend services.

Urban Company

July 2023 – June 2025

Software Development Engineer I

Bangalore, India

- Delivered platform enhancements that reduced avoidable support interactions and generated **Rs.2 Cr+ annual savings**, while improving service fulfillment and operational efficiency.
- Led migration of business-critical workflows from legacy systems to scalable service-oriented architectures, reducing technical debt and improving platform reliability.
- Built automation and self-service capabilities serving high-volume support operations, reducing manual effort while improving resolution efficiency across multiple geographies.
- Developed localization, compliance and operational capabilities that enabled expansion into Middle East markets and supported multi-geo platform growth.

Urban Company

Jan 2023 – June 2023

Software Engineering Intern

Bangalore, India

- Developed production-grade AI and automation tooling for customer-support operations, focusing on conversational intelligence, ticket understanding and agent productivity.
- Built LLM-powered summarization, response-generation and agent-assist systems that reduced manual effort and accelerated issue resolution for support teams.
- Developed conversational automation systems powering customer and partner support journeys while contributing to platform security and compliance initiatives.

Samsung R&D Institute India

May 2022 – Jul 2022

Software Development Intern

Remote

- Developed virtual-reality integration prototypes exploring synchronization between physical devices and their virtual counterparts.
- Built proof-of-concept solutions using Lua and Roblox-based environments to evaluate immersive interaction workflows.

SKILLS

Languages: TypeScript, JavaScript, Java, C++, SQL

Technologies: React, Redux, Node.js, Express.js, MySQL, MongoDB

Core Areas: System Design, Distributed Systems, Event-Driven Architecture, Microservices, LLM Applications

ACHIEVEMENTS

Competitive Programming: CodeChef 4-Star (1850), LeetCode (1830), Codeforces Specialist (1421)

Awards: Winner - Siemens Healthineers Challenge (HackOff v3.0), Runner-Up - B-Hacks

Leadership: Head - Aparoksha Technical Fest, Head - IIIC Incubation Center
